CATALIN MILICI

Project Title:

CM Website and App

Project Purpose:

To establish a robust online presence for CM Solutions SRL through a modern e-commerce website and a mobile app, aimed at increasing customer reach and sales.

Project Goals:

- Deliver a fully functional e-commerce website based on nopCommerce

- Develop a cross-platform mobile app using .NET MAUI

- Ensure seamless integration between web and mobile platforms

- Achieve high standards of UX/UI design and accessibility

- Complete the project within 5 months (Jan 2025 – May 2025)

Project Deliverables:

- Responsive e-commerce website (nopCommerce)

- Cross-platform mobile application (.NET MAUI)

- Documentation: technical specs, user guides

- Test reports and quality assurance documentation

- Deployment to production environment

Project Milestones:

- Project Kickoff – January 2025

- UI/UX Design Complete – February 2025

- Website Front-end and Back-end Development – March 2025

- Mobile App Development – April 2025

- Testing and QA – April to May 2025

- Deployment & Go-Live – May 2025

Estimated Budget:

(Not specified, assumed internal project or to be determined)

Project Team & Roles:

- Project Manager (You)

- Front-end Developer

- Back-end Developer

- Mobile Developer (MAUI)

- UI/UX Designer

- QA Tester

- DevOps Engineer (part-time)

Key Risks & Mitigation:

- Risk: Delays in integration between website and app
  Mitigation: Weekly sync meetings and continuous integration pipeline

- Risk: Design changes causing scope creep
  Mitigation: Strict change request process and stakeholder approval

- Risk: Performance issues on mobile app
  Mitigation: Early testing on multiple devices

Approvals:

(Project Sponsor, Stakeholders, Project Manager)
